EXPERIMENT -1

ROLL NO:- 240701303

NAME:- MAHESWARAN V

USER INTERFACE AND DESIGN

COMAPARSION OF UI DESIGN BETWEEN TWO FIGMA CREATION

BAD WEBSITE:-

ATTENDANCE

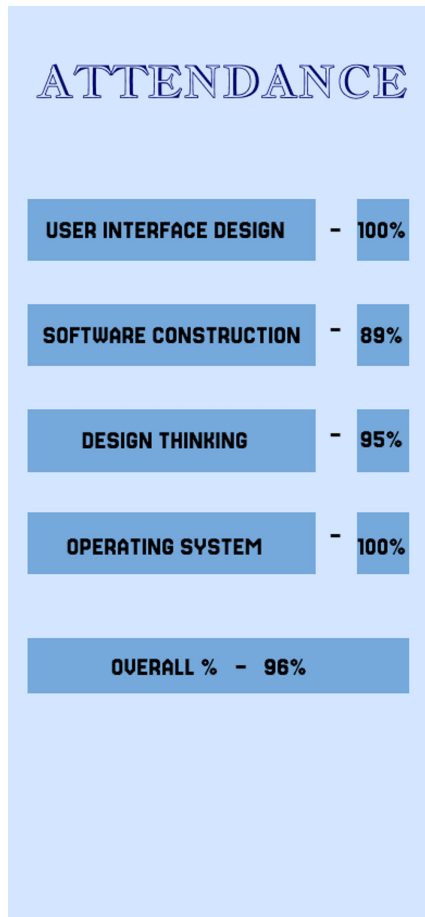

100 - User Interface Design

Software Construction - 80

90 - Design Thinking

Operating System - 100

Good website:-

Comparison between two websites:-

BAD WEBSITE:-

1. Design:-

- Minimalistic and Mismatched layout.
- Has contrasting background and icon colors.
- Has a bleak style and light texts.

2. Content:-

- Displays four courses with their name and attendance percentage

3. Purpose:-

- Designed for attendance maintainence.

GOOD WEBSITE:-

1. Design:-

- Attractive and matching layouts.
- Has a same color background and icon with different tones.
- Has a bold font style.

1. Content:-

- Displays four courses with their name and attendance percentage

3. Purpose:-

- Designed for attendance maintainence.

Key Differences:

- **Focus:** The first website is product-centric, while the second emphasizes storytelling and branding.
- **Design Aesthetics:** The first is out-of-order and mismatching; the second is simple and thematic.
- **Content Depth:** The second provides more detail and a good look, whereas the first focuses on just the content .
- **Target Audience:** The first seems tailored for kids; the second is for all students.
