

EXPERIMENT-3

NAME:- Maheswaran V

ROLL NO:- 240701303

1. Command Line Interface

Python code:-

```
import os
```

```
c=input("Command please: ")
```

```
if(c=="pyt delete --o"):
```

```
    filename = input("Enter the file name to  
delete: ")
```

```
    try:
```

```
        os.remove(filename)
```

```
        print("File deleted successfully.")
    except FileNotFoundError:
        print("Error: File not found.")
    except PermissionError:
        print("Error: You don't have permission
to delete this file.")
    except Exception as e:
        print("Unexpected error:", e)
else:
    print("Invalid Command")
```

OUTPUT:-

```
xe c:/Users/Admin/OneDrive/Desktop/cli.py
Command please: pyt delete --o
Enter the file name to delete: mahi.py
File deleted successfully.
PS C:\Users\Admin\OneDrive\Desktop>
```

2. Graphical User Interface

Python code:-

```
import os
```

```
import tkinter as tk
```

```
from tkinter import filedialog, messagebox
```

```
def delete_file():
```

```
    file_path = filedialog.askopenfilename()
```

```
    if file_path:
```

```
        try:
```

```
            os.remove(file_path)
```

```
            messagebox.showinfo("Success",  
"File deleted successfully!")
```

```
        except Exception as e:
```

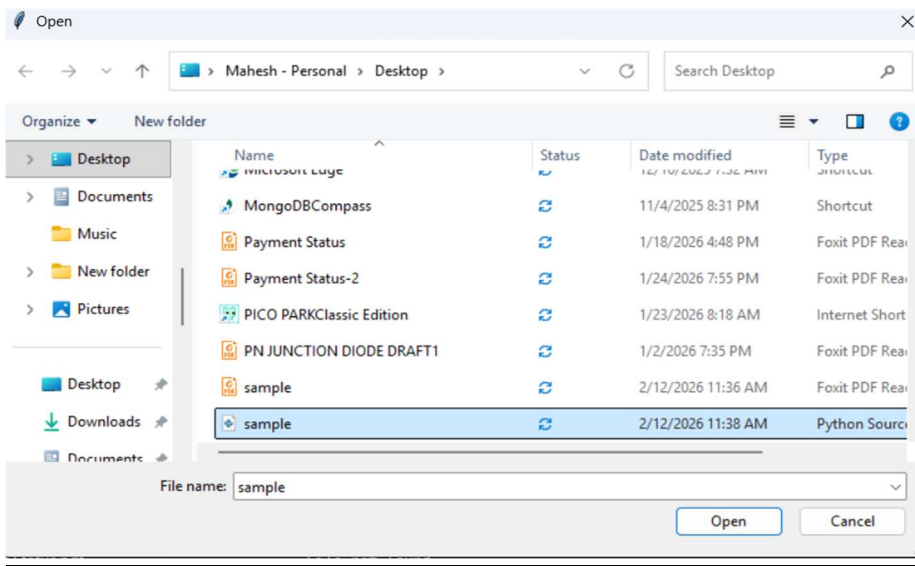

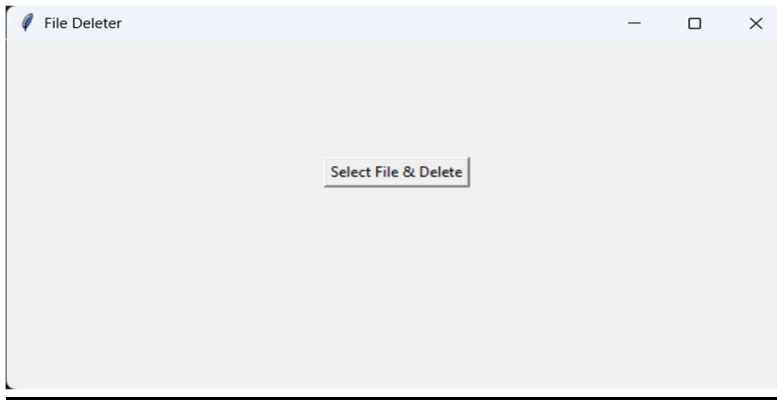

```
        messagebox.showerror("Error",  
str(e))
```

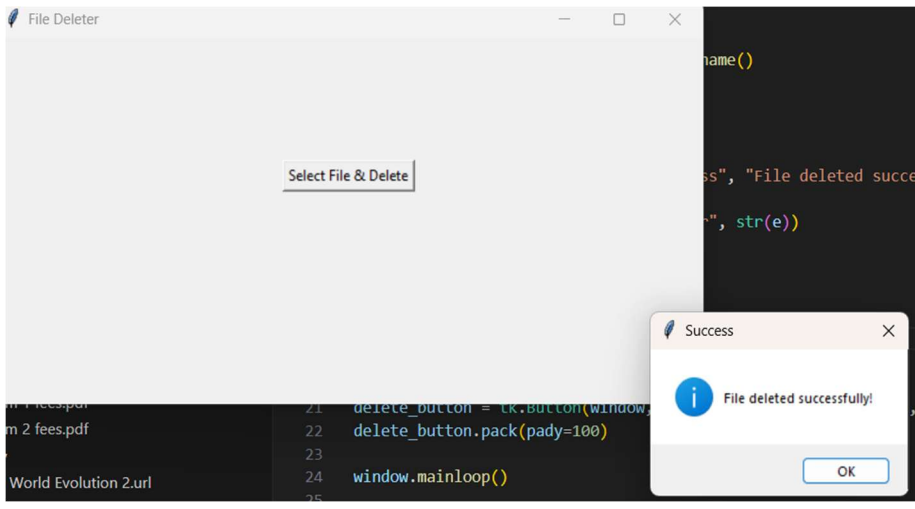

```
window = tk.Tk()  
window.title("File Deleter")  
window.geometry("600x300")
```

```
delete_button = tk.Button(window,  
text="Select File & Delete",  
command=delete_file)  
delete_button.pack(pady=100)
```

```
window.mainloop()
```

OUTPUT:-

3. Voice User Interface

Python Code:-

```
import os
```

```
import speech_recognition as sr
```

```
import pyttsx3
```

```
recognizer = sr.Recognizer()
```

```
engine = pyttsx3.init()
```

```
def speak(text):  
    engine.say(text)  
    engine.runAndWait()
```

```
def delete_file_by_voice():  
    with sr.Microphone() as source:  
        print("Say the file name to  
delete...")  
        speak("Say the file name to delete")
```

```
recognizer.adjust_for_ambient_noise(so  
urce)  
    audio = recognizer.listen(source)
```

```
    try:  
        file_name =  
recognizer.recognize_google(audio)
```

```
print("You said:", file_name)

# Clean common speech words
file_name =
file_name.replace("dot", ".")
file_name = file_name.replace(" ",
"")

if os.path.exists(file_name):
    os.remove(file_name)
    print("File deleted successfully")
    speak("File deleted successfully")
else:
    print("File not found")
    speak("File not found")

except Exception as e:
    print("Error:", e)
```

```
        speak("Sorry, I could not  
understand")  
delete_file_by_voice()
```

OUTPUT:-

```
xe c:/Users/Admin/OneDrive/Desktop/vui.py  
Say the file name to delete...  
You said: sample.pdf  
File deleted successfully  
PS C:\Users\Admin\OneDrive\Desktop> 
```
